

# Planning

## Design your Network: Construction Elements

### Introduction

These simple construction elements can help you make flyers and diagrams for your network. If you are on a computer, you can copy and paste the elements into your document. The elements also work fine with scissors and glue.

#### MATERIALS + SUPPLIES NEEDED

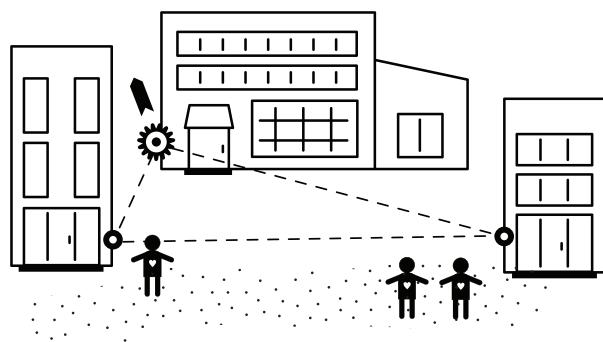

Paper

Scissors

Glue stick

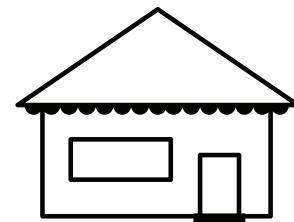

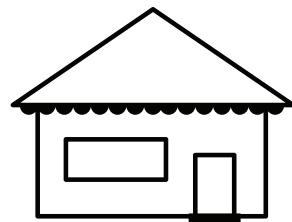

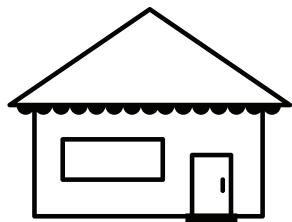

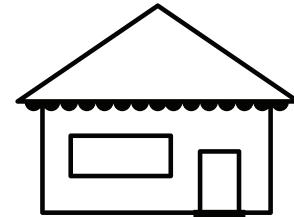

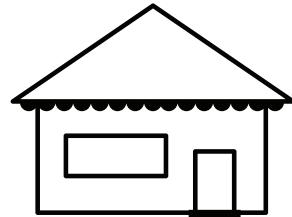

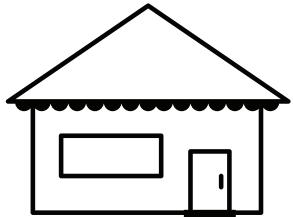

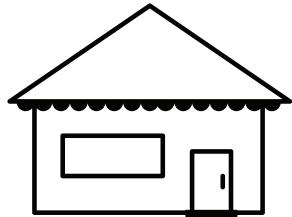

Computer (optional)

Graphic Design, presentation, or drawing software (optional)

# External Resources

If you want to make a diagram with these elements on a computer, you can find free, open source graphic design programs available online. You can use Inkscape for drawing diagrams and Gimp for working with photos. Google Docs also has a free drawing tool.

[the noun project](http://thenounproject.com).com has graphics that you can use along with these elements.
